

ENVIRONMENTAL POLICY

Continuous improvement is characteristic of all Masterlink Logistics activities.

We recognise that the incorrect use of our resources will increase their negative impact on the environment and we are committed to minimising this effect.

We are committed to acting responsibly in our business.

To achieve this goal, Masterlink Logistics has adopted the following principles:

Promotion of environmental awareness among our employees and service partners, informing and motivating them to join us and take responsibility.

Recycling and reduction of waste.

Using the resources of the business in a manner that best reduces their negative impact on the environment.

Continuously updating ourselves on environmental news and legislation and where possible strive to exceed these guidelines.

Using natural resources as efficiently as possible within our business.

Exercising caution in decision-making out of respect for nature.

Using products that are safe and harmless to the environment.

THE ENVIRONMENT IS OURS TO PROTECT AND IMPROVE FOR THE NEXT GENERATION
